Framework: Basic Knowledge of Flask, REST API Fundamentals

Security Skills: Vulnerability Assessment, Security Auditing, Network Security Fundamentals

Soft Skills:

Communication, Time Management, Interpersonal skills, Problem Solving, Time Management

Academic Projects:

Watch Website

HTML, CSS, JS

Watch Me is an e-commerce platform that operates as a retailer and distributor of watches. The website provides customers with a convenient way to browse, compare, and purchase authentic watches through a single online platform.

Cosmetic Inventory

Python

Developed a Python-based inventory and billing system for managing cosmetic products from different brands. The system maintains product records, including brand name, product details, stock quantity, pricing, discounts, and transaction history. It automates the billing process by generating invoices, calculating discounts, and recording purchase dates and customer transactions accurately.

Smart Helmet

C++

Developed a Smart Helmet as an IoT-based safety project to enhance rider protection and emergency response. The helmet was equipped with sensors to detect accidents and automatically trigger emergency alerts when a collision was identified. An esp32 microcontroller was used to collect sensor data, process events, and communicate with cloud services.

Personal Projects:

Portfolio

HTML, CSS, JS

Developed a responsive personal portfolio website to showcase my profile, technical skills, projects, certifications, resume, and contact information, providing easy access to my professional, academic achievements and my resume.
